

## The Do's and Don'ts

### The Do's

- Keep it clean-whenver dirt and grime start collecting, it is best to wash it off as soon as possible.
- Remove as much dirt and dust as possible by spraying it with water, then clean with a mild soapy solution (Dawn or Baby shampoo is recommended)
- Test ALL cleaning products on a small area before using it on a larger area.
- Rinse thoroughly with water immediately after the use of cleaning products. Avoid water spotting by drying with a silicone squeegee and microfiber cloth.
- Maintain the wrap's finish by using a waterless wash or spray wax. If you have your vehicle detailed, make sure the wax used is safe on vinyl graphics.
- Keeping these steps in mind when maintaining your wrap will help with the longevity of your wrap.

### The Don'ts

- Do not allow corrosive substances (like fuel) to remain in contact with the vinyl. The longer they sit, the more damage to the wrap they can cause.
- High-Pressure sprayers can lift the edge of your wrap and force water underneath damaging the wrap (*this will void the install warranty*)
- We HIGHLY recommend hand washing your wrapped vehicle.
- Do not use stiff/hard brushes to buffers on your wrap as this can cause lifting, discoloration, and damages.
- Do no use standard wax/polish on any matte, satin, or textured finishes. The chemicals in most standard waxes can damage the wrap and eat away at the finish.

**Car Wrap City LLC** offers a variety of wrap care products manufactured in the USA that will clean, seal and protect your new wrap. All the products that we carry are waterless, which makes spot cleaning on-the-go incredibly easy.

Stop by one our locations or give us a call to learn how you can get your wrap care products today.
